

Research Hints

Title

- A comparison between Afforested Areal Extent of Pachamalai Hills, Trichy using **Minimum Distance to Means Classifier** and Maximum Likelihood Classifiers on Sentinel 2A data

Introduction – Three Paragraphs – Paragraph 1

Paragraph 1

1. Definition / what is the research about. (at least 1 citation Mandatory)
2. Why is it of importance in today's world. (At least 1 citation Mandatory)
3. What are the applications of the research. (At least 2 citations Mandatory)

Introduction – Three Paragraphs – Paragraph 3

Paragraph 2

1. Total number of articles published in this topic over the past years in at least 2 databases (Google Scholar, Science Direct, Web of Science, Pubmed, E village, IEEE explore, any other).
2. most cited articles and their findings. (cite at least 4).

Introduction – Three Paragraphs – Paragraph 3

Paragraph 3

1. What are the lacunae in the existing research (the unanswered problem that motivated you to do the study)?most cited articles and their findings. (cite at least 4).
2. What is your (team/ department) existing experience in research.
3. Write the aim of your study (the approved research question).

Materials and Methods – Six Paragraphs

Paragraph 1

- Study setting - university or lab ,
- Ethical approval if working on human samples
- No: of groups,
- Sample size
- Pre test Power (use g power)

Materials and Methods – Six Paragraphs

Paragraph 2

- Sample preparation group 1

Materials and Methods – Six Paragraphs

Paragraph 3

- Sample preparation group 2

Materials and Methods – Six Paragraphs

Paragraph 4

- Testing set up
- Testing procedure

Materials and Methods – Six Paragraphs

Paragraph 5

- Data collection – output of the experiment/programs/algorithms/tests

Materials and Methods – Six Paragraphs

- Paragraph 6
- Statistical software used - SPSS
- Independent variables - list of variables
- Dependent variables – list of variables
- Analysis done – SPSS Analysis Test.

Results

Discussion – Paragraph 1 to n

- Paragraph 1
- Result summary

In this study, results show pH is higher than that of alkalinity and acidity of pond water than RO water

Discussion – Paragraph 1 to n

- Paragraph 2 to n
- Similar findings
- Opposing findings

Discussion – Paragraph 1 to n

- Second last paragraph
- Limitations of the study
- Last paragraph
- Scope for further/future research

Conclusion

- Should be the same as aim
- If aim of the study was to compare the wear resistance of the product, the
- Within the limits of the study, material 1 possesses high wear resistance (value along with units) than material 2 (value along with units)

Paperpile

- Go to google and install Paperpile extension
- Use only Chicago format
- Insert Bibliography

SPSS

- Data arrangement
- Test for different cases
